IIT Palakkad

Dear concerned about the academic profile of Mr. Divyansh Khare or Mr. Shubham Wakchaure,

Divyansh Khare and Shubham Wakchaure as 5th semester B.Tech Mechanical Engineering students, have designed a MATLAB GUI (Graphical User Interface) for **FE modelling, solving and post-processing of 3-D truss problems** to fulfil the requirements of a GCE (general category elective) course titled *ME3522: Introduction to Finite Element Methods* taught by me to a group of 41 U.G. students during Jul-Nov 2019.

With the investment of little more efforts, they could be making their work more professional and they could make available for the vogue as open source software. I appreciate their interest in accomplishing the task within a small time with required quality.

Sincerely,

KVN Surendra.
